

FRONTIERSMAN - LEADER KEY

SAINTS GLOBAL MEMBER

NAME: _____ BATTALION: _____ TROOP: _____

SKILL BADGE ADVISOR

NAME: _____ EMAIL: _____ PHONE: _____

LEADER KEY

WITH EVALUATION HINTS

**Gold boxes contain leader hints for evaluating each requirement*

STEP 1 | DISCOVER

INITIALS

- a) Explain the hazards of frontiersman-style bushcraft (fire, edged tools, cold/heat, dehydration, wildlife, and foodborne illness) and describe prevention and first aid responses. _____

♂ LEADER KEY

Look for practical prevention steps, not bravado.

- b) Explain frontiersman ethics: responsible resource use, respect for life, and lawful conduct; describe how overharvest and waste harm people and ecosystems. _____

♂ LEADER KEY

Ensure the tone is respectful and conservation-minded.

STEP 2 | PLAN

INITIALS

- a) Assemble a compact 'frontiersman field kit' and explain how each item supports shelter, fire, water, food, navigation, and first aid. _____

♂ LEADER KEY

Verify the kit is practical and explanations show understanding.

- a.1) Include at least one item for each category: shelter, fire, water, navigation, first aid _____

- a.2) Explain one 'improvised substitute' for two items _____

- b) Plan a primitive skills session at an approved site, including safety roles, fire plan, water plan, and leave-no-trace cleanup. _____

♂ LEADER KEY
Plan should be realistic and safety-first.

- b.1) Identify adult supervisor and safety boundaries _____
- b.2) List the skills you will practice (fire, water, shelter, cordage, etc.) _____
- b.3) Describe fuel gathering limits and fire control steps _____
- b.4) Describe site restoration and waste handling _____

- c) Explain lawful and humane trapping principles for your area, including what is permitted, what is not, and why humane standards matter. _____

♂ LEADER KEY
Accuracy and humility matter—no improvising laws.

STEP 3 | ACT

INITIALS

- a) Build and demonstrate two friction-based fire-starting methods (e.g., bow drill, hand drill) under supervision, using safe fire practices. _____

♂ LEADER KEY
Fire safety and method discipline are non-negotiable.

- a.1) Prepare a safe fire lay and fire-control plan (water/soil tool ready) _____
- a.2) Demonstrate correct body position and technique for each method _____
- a.3) Produce sustained ember and transfer to tinder (or explain failure points if conditions prevent ignition) _____
- a.4) Extinguish and cold-out the site correctly _____

b) Demonstrate three ways to make water safer in the field and explain when each method is appropriate and its limitations. _____

♂ LEADER KEY
Ensure the Saint understands limitations—filters alone are not always sufficient.

b.1) Demonstrate boiling (or explain proper boil approach if fire conditions restrict) _____

b.2) Demonstrate filtration (commercial or improvised pre-filter) and explain its limits _____

b.3) Demonstrate chemical treatment or UV method (if available) and explain correct use _____

c) Construct a practical shelter from natural materials or tarp/blanket in a way that minimizes environmental impact, and demonstrate weather-readiness. _____

♂ LEADER KEY
Safety and low impact matter more than aesthetics.

c.1) Select a site with safety in mind (drainage, wind, widowmakers) _____

c.2) Build a shelter appropriate to conditions (windbreak, rain shed, insulation) _____

c.3) Demonstrate a ground insulation plan _____

c.4) Restore the site afterward or leave no trace of the structure when appropriate _____

d) Demonstrate frontiersman cordage and fieldcraft by completing a small practical build or repair using lashings and knots. _____

♂ LEADER KEY
Verify the build is useful and knots are correctly tied and dressed.

d.1) Demonstrate at least three knots useful in bushcraft (e.g., clove hitch, taut-line hitch, square knot) _____

d.2) Use a lashing or binding technique to build/repair something useful (pot hanger, tripod, simple pack frame repair, gear hanger) _____

d.3) Explain why your knots and materials were chosen _____

d.4) Test the build safely for strength and stability _____

e) Demonstrate age-appropriate trapping skill through one of the following: a simulated trap set for learning (non-functional), a legal live demonstration by a licensed adult, or a tracking/sign-reading exercise that explains animal travel and behavior without capture. _____

♂ LEADER KEY
This must remain humane, legal, and age-appropriate—simulation is acceptable and preferred.

e.1) Explain the purpose of the set (education, not harm) and the legal boundaries _____

e.2) Demonstrate two trap-set concepts safely (e.g., location selection, guiding, concealment) using simulation materials _____

e.3) Identify at least three signs of animal movement (tracks, scat, rubs, trails) and what they suggest _____

e.4) Explain humane considerations and why suffering is unacceptable _____

f) Demonstrate basic field-to-table responsibility by completing a supervised food-preparation and preservation task: field-dressing education (demonstration with a mentor or instructional model), preparing meat safely, and explaining a smoking/drying preservation concept. _____

♂ LEADER KEY
Prioritize food safety and legality; use store-bought meat if needed.

f.1) Explain cleanliness, temperature, and cross-contamination controls _____

f.2) Prepare a simple meat-based meal safely using legally obtained meat (or mentor-supervised harvest where lawful) _____

f.3) Explain the steps and purpose of smoking or drying (preservation, flavor, moisture control) at a high level _____

f.4) Describe how you would store and protect food from animals in the field _____

STEP 4 | REFLECT

INITIALS

a) Explain what skill required the most patience and what you learned about resilience and decision-making under discomfort. _____

♂ LEADER KEY
Look for self-control and realistic lessons learned.

b) Describe how frontiersman skills can be used for service and preparedness today, and identify one future skill you want to improve next. _____

♂ LEADER KEY
Ensure the application is practical and service-oriented.
